

Ten Plagues Part 2 - Preschool and Toddler Activities

Warm-up Activities: Playdough Hailstones.

Let's make hailstones! Show children how to roll a ball out of blue, gray or white playdough. Then show them how it crushes everything beneath it (make other playdough shapes) by holding it up and letting it drop on top of the other playdough objects.

Plague Snack Ideas

Plague Part 2 Snack Ideas – Ideas for hail: Ice blue popsicles, popcorn, jumbo marshmallows, popcorn balls, or cupcakes with light blue icing. If your kids like gross stuff, make Boils: Pink popcorn balls or cupcakes using a little red food coloring. Use wafer cookies and raisins to make eyes on cupcakes.

Plagues Room Decorations

Bulletin Board Decoration Idea: Make an extra set of the Plague Puppets. Stick them to the board flat. Put the labels and numbers underneath them.

Plague Sticker Activities / Rhymes

Rhymes - See the Toddler and Preschool lessons for Rhymes for each plague. Plague Stickers - Cut out stickers from sticker pages. Apply restickable or Repositionable sticker glue to the backs. (See Crafts page for how to make them, and lesson or when to use them). Kids will stick stickers on the Israelite or Egyptian Child pictures as you read the rhymes about each plague. Have an assistant pass out the stickers to children before each plague so they can take turns putting them on the pictures.

Pretend Play Activities

Children pretend to be either Egyptians or Israelites during the Classroom Plague Activities / Skit. (See the Classroom Activities / Skit page for instructions).

Review of Plagues / Puppets Pretend Play Activity

Have each child make one Plague Puppet for their craft, or have teens help you make enough puppets to have one per child. Each child wears one Plague puppet. Call out the plagues in order, one at a time. Point to Plague on bulletin board. The child / children wearing that puppet get up and "fly their bug", hop their frog, spread their disease, etc. The water droplet and blood droplet come up together. The water droplet can hold up his puppet, followed by the blood droplet, to show how the water turned to blood. Draw the blinds, and turn off the lights for the Darkness. Make sound effects for wind and thunder (Boom, boom) for Hail.

Classroom Plagues / Skit Part 2 (Balls and Glider Bugs)

Follow instructions on Week 4 Classroom Plague Activities and Crafts to see how to make and use the Plague Balls and Glider Bugs.
